# INTRODUCTION

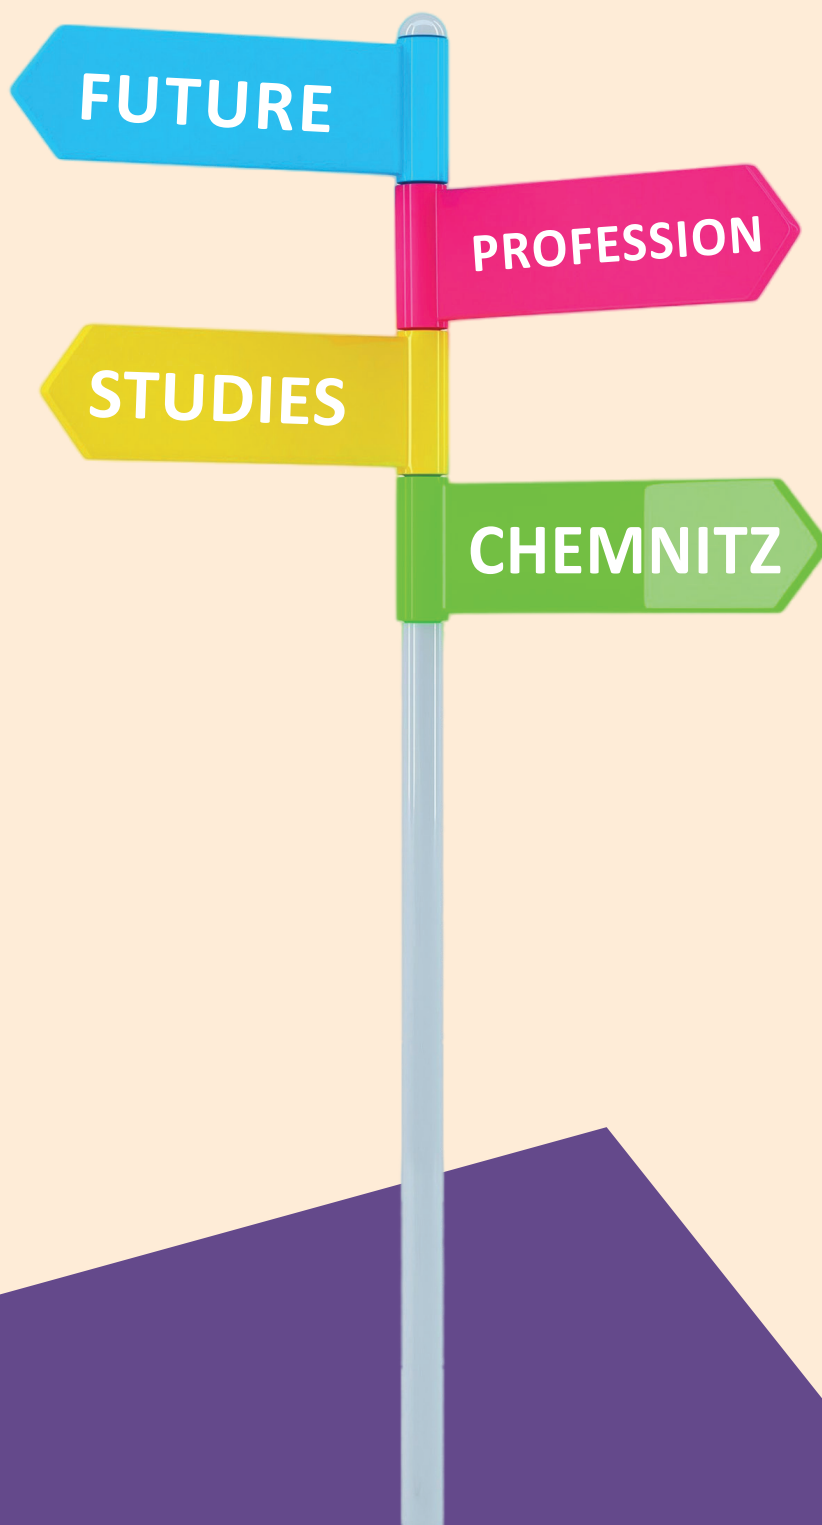

## What happens after school – training or studies?

Career and study choices are part of life planning. There are several opportunities to orientate yourself professionally – from internships and voluntary services to inspiring events.

The following pages are intended to provide some initial information, links and time frames to support you and your child in career and study orientation.

There is no need to look far afield when searching for the suitable educational path.

In Chemnitz and the surrounding areas there are numerous top companies, universities and vocational schools where your child can get off to a flying start.

## WELL INFORMED

These pages will take you further online:

in the region

Information about studying  
in the region

**Tip – hint:** You'll find information about vocational training, studies and support services on the website of the Jugendberufsagentur „Haus der Jugend Chemnitz“

## Your contacts at school

At school young people learn about their personal strengths, develop specific career and study aspirations and gain their first practical experience in companies. A wide range of offers is made, such as: applicant training and career counselling, project days, company visits as well as internships and visiting educational fairs.

There are many people supporting you and your child.

### TEACHERS FOR CAREER ORIENTATION

**Special needs school | secondary school | grammar school | vocational school all students**

- offers for careers orientation at school
- contact persons for internships

### CAREERS ADVISORS IN THE EMPLOYMENT AGENCY

- organisation of company tours, joint visits of educational fairs

### CAREER ENTRY COMPANION

**Special needs school | secondary school**

- **students with the risk of failing graduation**
- **starting from penultimate/second last school year**

- support in achieving graduation
- help with career orientation
- searching internships and vocational trainings
- identification of support needs and placement in suitable measures

# INTERNSHIP

**Whether voluntary or compulsory, getting a taste of practical experience is important for your future careers choices.**

... **during school time:** the internship during school time usually takes places in the 8th or 9th grade an lasts two weeks. Your child is able to gain first practical experiences and find out whether they like the profession. Your child is responsible for finding the internship. An early application (3 months prior) and to several companies increases the chances of getting the desired internship.

... **during holiday period:** Further internships bring more valuable experiences. It a good idea to use the holiday period for this. Usually internships during holidays are possible for those aged 15 and over. An internship during holidays could be an school event. The school decides on this. If this is the case, your child will have liability and accident insurance through the school, just like if ist during school time. Ask the school beforehand.

## Finding internships:

**How does your child find an internship?**

Whether a large corporation or a small local craft business, an internship can be done in any company.

1. Use educational fairs to get in touch with companies.
2. Have your child asks friends an acquaintances about available internships.
3. The career counselling of the youth empolymet agency supports you in finding internships.
4. The chambers and guilds (e.g. the chamber of crafts and the chamber of Industry and Commerce) also provide support in finding an internship.

## NOTES:

Jugendberufsagentur
